

What do you already know about generative AI? Discuss this with neighbors.

1. Companies are investing billions in “AI”. What are they buying with those dollars?
 2. What is “large” about large language models? (Can you connect this with any concepts from CS 375?)
 3. How did ChatGPT/Claude/Gemini acquire the skill of, say, writing a Python function? Be as specific as you can.
 4. Is AI smarter than humans yet? How can we tell?
-
