Database Concepts:
Server
Client
Table
Row
Attribute (or column)
Query
SQL

SQL statements:
show databases;
create database databasename;
drop database databasename;
use databasename;
show tables;
select ...
insert, delete, update, explain, ...
grant ...

All SQL statements end with _______

90%+ of database queries are ____________ statements

A database join operation does this:

mysqladmin is for

mysqldump is for

mysql is for

Where can I find documentation on MySQL statements?

Tasks:
mysql -u username -p -h hostname
  show databases;
  use database databasename;
  show tables;
  select * from tablename limit 10;
mysqldump -u root -p databasename > outputfile
